

How to Build a Nail Drag

A nail drag is the ideal tool for maintaining a smooth and consistent infield surface—making your field play like the pro's. Use the following components to build your nail drag:

- Build with 2" x 4" boards
- Pre-drill straight holes for nails
- Use 40 penny nails
- Use 1" x 4" to cover 2" x 4" on top to hold in nails
- Use eye bolts and a chain for pulling. Put eye bolts in the face so the drag can be flipped over and used as a float.
- Stagger nails 1 ¾" apart – 2 rows in each board

Remember, a nail drag loosens and remixes an infield and a mat drag will firm a field up slightly while creating a nice appearance. Use the appropriate drag for your needs.
