

# More than Just Sports Fields: *Additional Applications of Turface<sup>®</sup>*

For over 50 years, Turface Athletics™ has been the household name for consistent performance and safety when it comes to sports fields at all levels. With the wide use of these particles, people have found alternative uses for Turface products to accomplish various tasks. From melting ice to absorbing oil spills, Turface can help you in countless situations.

## WINTER TRACTION & ICE MELTING

- Absorbs melted water before refreezing
- Provides traction for pedestrians and prevents tires from spinning
- Hard ceramic particles help break down dense ice

## SPILLAGE

- Absorbs chemicals, grease and oil from shops, kitchens and garages
- 74% pore space absorbs liquids into internal spaces
- Easy clean-up and removal once liquids are absorbed

## LAWN & GARDEN

- Modifies soil and creates a balanced growing environment
- Reduces irrigation cycles by holding its weight in water
- Permanently works in the soil, 3% degradation over 20 years

## HIGH-TRAFFIC AREAS

- Prevents compaction from foot traffic, allowing air to access root zone for more vegetative establishment
- Creates barrier between shoes and mud for a quick fix around dog parks, festival grounds and construction sites

## DRAINAGE CHANNELS

- 1) To prevent puddle areas, dig 3-foot hole with auger
- 2) Backfill with Turface ceramic particles to allow for enhanced vertical drainage
- 3) Particles drain faster than sand once pore spaces reach capacity
